

MINOR WDA 360° 非接觸式角度位移傳感器

WDA—BA

WDA—BZ

WDA angle sensor sensitive high-performance integrated magnetic, using non-contact magnetic signal sending characteristics, with the micro-processing(micro-computer) intelligent signal processing made full scale of the new generation of 360° (option for 90°, 180°) and a programmable selected measuring range of the angle sensors. The sensor has high resolution and good temperature stability advantages, cost-effective excellent.

Main Features

- Non-contact, no noise, high sensitivity and reproducibility, close to infinite rotational life, high-frequency response characteristics;
- Environmental applicability, can be used for water, oil, steam, dust, high and low temperature, shock and vibration harsh industrial environments;
- 360° absolute position measurement, well alternative to optical encoders, rotary changing transformers and conductive plastic potentiometers

| Series code | | WDA | | | |
|---------------------|--|--------------------------|---------------------------|----------------------------|--------|
| Parameters | Test Condition | Data Sheet | | | Unit |
| | | Min. | Typical | Max. | |
| Supply voltage | — | 12 | 12 | 24 | V |
| Current consumption | — | — | 10 | 16 | mA |
| Measure angle | — | 360 | | | Degree |
| FS Output | — | 0.02 | V/2 (中点) | V可调 (5≤V≤12) | ±0.01V |
| Temp of Storage | — | -55 | | 150 | °C |
| Temp of Application | — | Commercial Grade 0~55 | technical grade -20~80 | military device -40~125 | °C |
| Middle T.C. | -40°C < TA < 80°C | ≤ ±5mV | | | FS |
| End T.C. | — | Commercial Grade 1% | technical grade 0.5% | military device 0.5% | FS |
| Resolution | equivalent 4096 grads | 0.087 | | | Degree |
| Linearity | — | 0.1% (≤60°) | ±0.2% (≤150°) | ±0.2% (≥150°) | FS |
| Protection class | IP67 | | | | |
| Connection | shield wire, teflon wire; brown: + blue: - black: output | | | | |
| Remarks | Low output voltage can not reach absolute 0V, the lowest 0.05V; There is 1° of the nonlinear zone between 0° and 360° during 0~360° circle measuring. Recommend use 5°~355° measurement range to ensure the output signal linearity. | | | | |

Naming rule:

360----- rotar angle

V/A-----V: voltage output/A: current output

BA/BZ-----BA: end face installation /BZ: flange mounting

WDA----- rotary sensor
